The American Board of Telehealth promotes the highest standard for professionals and paraprofessionals in implementation and utilization of telemedicine.

Our goal is to weave telemedicine into the fabric of health care delivery across the country as a vital tool in promoting access to quality care no matter where the facility is located.

EDUCATION | ADVOCACY | RESEARCH | COLLABORATION | INNOVATION

CORE Certificate Program

Online, self-paced

Since 2008, the Helmsley Charitable Trust has placed a priority on supporting projects that help ensure equal access to high quality health care, especially in rural areas. eCARE helps us achieve this mission in many ways. We know that educating medical professionals will impact the lives of patients, both today and in the future. In partnership with Avera, we’ve been able to powerfully move telehealth forward as a health care delivery method.

- Walter Panzirer - Trustee of the Helmsley Charitable Trust
